Serving the Processing & Manufacturing Industries: Bulk Material Screening & Moisture Measurement solutions

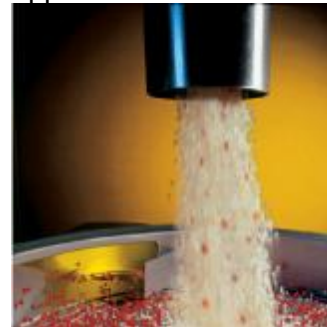

With effect from January 1st 2009 Hearne Quinton can offer the complete Kason range of Vibratory Screeners, Fluid Bed Dryers/Coolers/Moisturisers.

Headquartered in Milburn, New Jersey and with a European Sales and Support office located in Stoke-

on-Trent, Kason are award winning innovators in powder/bulk solids technology. The list of industries and materials which may benefit from Kason screening technology is truly impressive. From Animal Feed to Zirconium Oxide and numerous other materials; if you need to

separate, sift, scalp, de-lump, de-water or de-dust please contact us with details of your application.

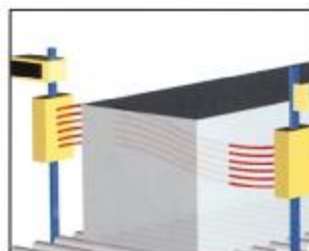

Solid/solid separation

MALCAM develops, manufactures and markets online and offline, microwave volumetric moisture and density information systems based on patented, innovative microwave data processing technology and expert systems. This technology, which provides highly accurate and repeatable volumetric measurement of material, is more reliable than alternative methods, which only measure surface moisture content. Malcam's moisture

measurement technology is integrated into a line of Microwave Measurement Analysers MMA™ specifically designed to improve line productivity, enhance product quality and reduce merchandise wastage, with an exceptionally fast return on investment.

They are suitable for an extensive range of industries requiring the ability to measure moisture content and density deviation in their products online, inline and in real-time. Typical examples include manufacturers of tobacco, synthetic fibres, non woven materials, paper, food and bulk chemicals.

Moisture Measurement – *continued*

MALCAM pioneered the integration of microwave-based moisture and density analyzers into the tobacco market and leads this market. MALCAM's systems are operational in hundreds of sites worldwide in various industries and

applications.

Other developments....

Our website has been recently updated and you can find details and brochures for all Malcam and Kason products in addition to various links and an enquiry form. We

anticipate adding more new products in the near future.

We are investigating the possibilities of adding the following categories of products to our range:

- Haz Chem storage
- Liquid / Fuel Tanks
- Material Handling Valves
- Level Controls
- Blending Systems

About Our Organization...

Hearne Quinton Ltd are Manufacturers' Agents' specializing in the supply of products for the bulk material processing and

manufacturing industries. We aim to keep you regularly informed of new products as they are added to our range and

offers from the leading Manufacturers whom we represent. Please do not hesitate to let us know how we can support your requirements. Full contact information is shown on this page.

Our best wishes for 2009 and a successful year ahead
