Vortex® Valves Europe, Ltd

On the road again.....

Following a very successful appearance in Scotland during March the Vortex mobile display unit (the MDU) will be back this month and can be scheduled to arrive at your facility when this fine range of high quality valves may be handled and seen in operation.

MALCAM's MMA-2020 System provides accurate online & real time, non-contact and non-destructive volumetric scanning of bulk wool bales.

Main Features:

- On-line, real time
- Volumetric

(inspects whole bale)

- Uniformity
- 100% of products (not sampling)
- Non-destructive
- Accurate
- Not influenced by colour or ambient conditions
- Advanced, industry leading, S/W

Do you need to screen, classify, de-water, delump or sieve? Kason will test material and/or may agree to loan a centrifugal screener to establish suitability. Short term

rental is another option offered by Kason Corporation. Recent applied solutions include the dewatering of contaminated waste.

About Our Organization...

Hearne Quinton Ltd are Manufacturers' Agents' specializing in the supply of products for the bulk material processing and manufacturing

industries. We aim to keep you regularly informed of new products as they are added to our range and offers from the leading Manufacturers whom

we represent. Please do not hesitate to let us know how we can support your requirements. Full contact information is shown on this page.
